CUSTOM FURNITURE

DESIGN & BUILD PROCESS

1. Initial Consultation Meeting

This is our first meeting in the workshop where we will go over the general concept of the design, dimensions, materials and finishes etc. It is helpful at this meeting to bring along any inspiration images that you may have. This consultation is complimentary. (Initial consultations can also be held on site at your home or business if needed or preferred. There is an \$85 fee for on site visits due at the time of the meeting, which will be applied to your project total if you move forward with the build.)

2. General Ballpark

As all of our work is custom designed and handmade it is often helpful for clients to have a general ballpark idea of the price of a project before we get into the design process. We try to be as accurate as possible, and we are usually within ~20% of the final price, but keep in mind we can't guarantee a number until the design is finalized.

3. Designing and Revising (50% Design Deposit)

At this point we'll begin working up design plans and images. We'll start by drawing up an initial design to use as a jumping off point, and then have a bit of back and forth to get all the functional elements and stylistic details just right. Our design services are billed at \$85/hr and the deposit requested at this time will be 50% of the estimated design time required (remainder to be credited to the build or refunded).

4. Final Design and Build Scheduling (50% Build Deposit)

When the design is complete we can put together a final quote. Once approved we'll request a 50% deposit and get your project on the build schedule. At this point we'll be able to get you an approximate completion date that we'll firm up a little later in the build process.

5. Delivery/Installation (Final Payment)

Once building and finishing is complete we can deliver and install the piece for you, or you may arrange to have it picked up. Enjoy!
